I graduated from Fırat University, Software Engineering department. I am a quick learner, and when I set a goal, I break it into small steps, manage my time carefully, and take smart risks when needed. I am currently focused on web development. I am actively seeking opportunities to apply my knowledge and grow professionally. I am always open to learning new technologies to enhance my skill set and ensure my work stays useful, up-to-date, and ready for the future.

EXPERIENCE

Java Backend Developer - Part Time, *Craft Technology* — 07/2025 – 09/2025, İstanbul
- I took an active role as a backend developer in the mobile application development process.
- I contributed to creating the necessary APIs with Spring Boot.
- I made a big investment in my development by receiving Agile and Scrum coaching.

Software Engineer Intern - Long Term, *GİB Teknoloji* — 02/2025 – 06/2025, Ankara
- I developed a scalable, enterprise-level backend project called Personnel Tracking System using ***Spring Boot***, aligned with public sector architecture.
- As part of the project, I created secure RESTful APIs. I integrated features into the project that included role-based access control and automatic email notifications based on business rules.
- I applied SOLID principles and used CI/CD tools frequently throughout the process.

Software Engineer Intern, *GİB Teknoloji* — 07/2024 – 09/2024, Ankara
- Strengthened ***Java*** development skills while gaining hands-on experience with the software development lifecycle (SDLC), agile methodologies, and design patterns.
- Enhanced theoretical knowledge through exposure to real-world projects and gained insight into the logic behind nationwide enterprise systems.

EDUCATION

Fırat University, *Bachelor's Degree in Software Engineering, GPA: 3.04/4* — 2021 – 2025

University of Beira Interior, *Computer Science and Engineering, Erasmus (Portugal)* — 02/2023 – 07/2023

FU School of Foreign Languages, *English Preparatory Year, English B2 (Upper-Intermediate)* — 2020 – 2021

PROJECTS

Bir Dakika Dinle, *birdakikadinle.com* 🔗
It is a listening platform that offers both texts and audio versions of specific topics for those who want to learn Turkish.

Tech Stack: *Java, Spring-boot, JWT, TypeScript, React, MUI, PostgreSQL, Caffeine Cache, Rate Limiting, Docker*

Personnel Tracking System 🔗
A comprehensive back-end project designed to manage personnel, units, gates, turnstiles and working hours, providing convenient access control, email notification and salary calculation.

Tech Stack: *Java, Spring-boot, Spring Data JPA, PostgreSQL, Liquibase, Spring Security, JWT, Apache Kafka, Redis, Hazelcast, Docker, Docker-compose, JUnit*

Shadowise Learning App, *BTK Hackathon 2025* 🔗
It is a Spring Boot application that automatically generates test questions, flashcards, and summaries from PDF documents uploaded by users with the support of artificial intelligence. It is designed to optimize the learning processes.

Tech Stack: *Java, Spring-boot, Spring Security, JWT, Spring Cloud OpenFeign, MongoDB, Docker*

SKILLS

Languages
Java, Python, Javascript

Frameworks, Libraries, Tools
Spring Boot, React, SQL, NoSQL, Git, Docker
