 arifozcan.tr

I am a quick learner, and when I set a goal, I break it into small steps, manage my time carefully, and take smart risks when needed. I am currently focused on web development. I am always open to learning new technologies to enhance my skill set and ensure my work stays useful, up-to date, and ready for the future.

EXPERIENCE

- | | |
|---|-----------------------------|
| Full Stack Developer, ISSD Bilişim Elektronik A.Ş. <ul style="list-style-type: none">I am involved in the web development of traffic management systems. I develop features regarding the display and management of relevant traffic data at junctions and related devices. | 11/2025 – Present
Ankara |
| Software Engineer Intern - Long Term, GİB Teknoloji <ul style="list-style-type: none">I developed a scalable, enterprise-level backend project called Personnel Tracking System, aligned with public sector architecture.As part of the project, I created secure RESTful APIs. I integrated features into the project that included role-based access control and automatic email notifications based on business rules. | 02/2025 – 06/2025
Ankara |
| Software Engineer Intern, GİB Teknoloji <ul style="list-style-type: none">Strengthened knowledge of software development lifecycle (SDLC), agile methodologies, and design patterns.Enhanced theoretical knowledge through exposure to real-world projects and gained insight into the logic behind nationwide enterprise systems. | 07/2024 – 09/2024
Ankara |

EDUCATION

- | | |
|---|-------------------|
| Firat University, Bachelor's Degree in Software Engineering, GPA: 3.04/4 | 2021 – 2025 |
| University of Beira Interior, Computer Science and Engineering, Erasmus (Portugal) | 02/2023 – 07/2023 |
| FU School of Foreign Languages, Preparatory Year, English B2 (Upper-Intermediate) | 2020 – 2021 |

PROJECTS

- Personnel Tracking System** 
A comprehensive back-end project designed to manage personnel, units, gates, turnstiles and working hours, providing convenient access control, email notification and salary calculation.
Technologies: *Java, Spring-boot, Spring Data JPA, PostgreSQL, Liquibase, Spring Security, JWT, Apache Kafka, Redis, Hazelcast, Docker, Docker-compose, JUnit*
- AI-Powered Document Distribution System, Graduation Project**
Built an AI-driven platform to analyze incoming official documents and automatically route them to the appropriate university departments.
Technologies: *Python, Machine Learning, Large Language Models (LLM), BERT, Text Mining*
- Shadowise Learning App**  , BTK Hackathon 2025
It is a web application that automatically generates test questions, flashcards, and summaries from PDF documents uploaded by users with the support of artificial intelligence. It is designed to optimize the learning processes.
Technologies: *Java, Spring-boot, Spring Security, JWT, Spring Cloud OpenFeign, MongoDB, Docker*

SKILLS

Languages <i>Java, Python, Javascript</i>	Frameworks, Libraries, Tools <i>Spring Boot, React, SQL, NoSQL, Git, Docker</i>
